

MPRO Receives Technology Innovation Award

FARMINGTON HILLS, Mich., October 8, 2018 – MPRO is pleased to announce that it received a 2018 Technology Innovation Award at [Tech Impact's TechForward](#) conference in Austin, Texas.

The Technology Innovation Award was awarded to MPRO for a proposed project to create a database to identify outlier opioid prescribers and improve their prescribing practices through education and technical assistance. The project is scheduled to begin in November and extend into 2019.

“We at MPRO are keenly aware of the epidemic of opioid overdoses and overprescribing that currently grips the nation. We plan to work at the root of the problem – curtailing the overuse of opioid prescriptions that often leads to the use of other, more potent medications and illegal narcotics amongst patients,” said Dr. Leland Babitch, president and CEO of MPRO.

MPRO's award was one of two grants selected by Tech Impact to receive an award out of almost 100 entries.

Tech Impact is a nonprofit leader whose mission is to empower communities and other nonprofits to use technology to better serve our world.

About MPRO

MPRO is a national leader in healthcare quality improvement and medical review based in Farmington Hills, Michigan. Our goal is simple - we are helping healthcare get better. MPRO provides medical consulting and review, as well as data analysis to federal agencies, state Medicaid and public health organizations, healthcare facilities, private health plans and other third-party payers. Our services offer our clients and partners access to a proven, impartial, connected resource that understands and navigates the intricacies of healthcare. For more information, visit www.mpro.org
