

SNF Collaborative: Portal User Guide

About the New Portal Guide

This document serves as a guide to navigate and use MPRO's secure web portal created for the Skilled Nursing Facility (SNF) Collaborative. As a participating facility in the collaborative, you agree to submit timely data using the platform detailed below. MPRO will analyze the data submitted each quarter and provide SNFs with facility-specific feedback reports.

Data uploaded to this portal are to be used for **quality improvement purposes only**. The intent of the data is to assist participating hospitals and SNF providers to target areas for improvement and work collaboratively to identify intervention strategies. Data are **not** to be used for any administrative purposes including changes to referral patterns or development of a preferred provider list.

Portal Access

At the time of joining the SNF Collaborative, each participating SNF should have provided two contacts to serve as the facility's portal users. Additional contacts may be identified, but a minimum of two contacts from each site is required. If you have rights to multiple facilities, your username (your email address) will remain the same. Prior to the portal opening on November 1, 2019, MPRO will email each user an assigned username (your email address) and a temporary password. You should **change your temporary password** once you enter the site. MPRO will not have access to your password. If you forget your password, you will be able to make a new one without MPRO's support.

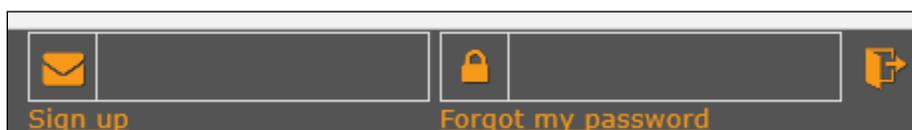

If you would like to grant additional users access to your facility's portal, a formal request must be sent to: snfportalhelpdesk@mpro.org.

If your facility fails to submit data for two consecutive quarters, you will no longer have access to the SNF portal and your facility's account will be deactivated.
